## Guru Nanak Sacred Forest - A Mini Urban Forest with Native Species

Guru Nanak Sacred Forest Committee is constituted for performing duties related to Guru Nanak Sacred Forest which is a mini urban forest on campus with native species with Dr Navjot Kaur, Principal as the Coordinator. Guru Nanak Sacred Forest (GNSF) established in April 2019 is a visionary project aiming to promote a sustainable environment and has since blossomed into a thriving natural habitat, comprising 600 trees with 52 diverse native species spread across 180 square meters. The commitment of the College towards environmental sustainability, biodiversity conservation and the preservation of genetic heritage is exemplified by this mini-urban forest. Serving as a sanctuary for insects, birds and other fauna facing the threat of extinction, the GNSF also plays a crucial role in mitigating the Carbon Footprint of the region. Bahihari Kudrat Healing Herbs Garden within the Forest reiterates the dedication of the Institution towards the cultivation of sacred herbs. Faculty and students actively engage in research projects, contributing to the scientific understanding of this unique ecosystem that integrates curative diversity through medicinal plants and cultural diversity, including spiritual values. The installation of an Air Quality Index (AQI) on the forest's outer wall reflects the College's commitment to monitoring and maintaining environmental health. This holistic approach underscores the role of the College as a steward of both environmental and cultural well-being. Various activities promoting environmental sustainability are regularly organised in collaboration with several
